

Curriculum vitae
IGNACIO CARMONA V
BLOCKCHAIN DEVELOPER & SECURITY
feralcode0x@gmail.com
V Región Chile

Summary

Self-taught blockchain developer with 3 years of experience. Strong ability to learn quickly and conduct research, use abstract logic, and solve problems.

Education

Colegio San Esteban Diacono
Escuela de Cine de Chile

Investigation

YouTube bootcamps on Solidity development, security, currently Solana development, project development and internet research.

Projects

Development of smart contracts for decentralized finance applications: Dapps, tokens, crowd sales, bridges, abstract contracts, proxy, and frontend UI.

Auditing and security, blockchain contract review, penetration testing, and vulnerability scanning.

Ecommerce development with traditional payment systems.

Other types of scripts for penetration testing, bug testing, transfers, and research.

Portafolio

<https://github.com/feralCode0x>

Abilities

Blockchain development and audition in Solidity and currently learning development in Solana. React and Typescript frontend, ecommerce with traditional finance.

Tools

Javascript, Typescript, Node, Express, React, Solidity, Web3, Ethers, Cast, Remix, Linux, Mongodb, Css, Html, Github, Anchor, Solana-cli.

Disponibility

Remote. Income expectation to be discussed

Objective

To grow, develop, learn, advance and expand in blockchain development, a field of computer science with great potential that can expand into other different areas.
